Subject: Microsoft Settlement

Greetings,

I was appalled at the most recent proposed settlement of the case against Microsoft. Everyone agrees at this point that Microsoft is guilty, yet they continue to practice questionable if not outright illegal business practices. The department of Justice seems content to just stand by and let this happen though. You are servants of the public good and it is your duty to redress grievances against the American people, yet you seem content to let Microsoft get away with breaking the law without any punishment whatsoever.

Microsoft needs to be punished for it's actions, not just told that they are "bad boys" and let off. Please pursue this action until justice is done, and Microsoft suffers real punishment for it's illegal actions. Our government is the only organization powerful enough to confront the Microsoft monopoly for us.

Please, for the sake of all of us, do not settle this action until Microsoft has been punished for it's actions, and there are guarantees that it will never act in this way again.

Thank you.
